

P-9801

<https://www.gigahertz-optik.com/en-us/product/p-9801/>

Product tags: Dosimeter , Multi-Channel

Description

The P-9801 series optometers are one of the most powerful light measurement instruments available for multiple light detector head applications.

For use in those applications the P-9801 features:

Industries most powerful and fastest multichannel light meter

- simultaneous measurement of all eight detector channels
- wide linear detector signal dynamic range
- short rise time with variable sampling rate
- fast multi-channel data-logging
- manual and remote control operation
- RS232 and IEEE488 interface
- powerful 16 bit microprocessor with large memory
- external trigger input with pre-trigger function

P-9801 Front

P-9801 Back

True eight-channel operation

The P-9801 is a true eight-channel optometer designed with eight photocurrent-to-voltage amplifiers (no multiplexing) and eight 12 bit highly linear analogue-to-digital converters (ADC) enabling signal sampling of all channels simultaneously.

Ten magnitudes dynamic current measurement range

Each channel's wide 0.1 pA to 2 mA signal range covers the dynamic range of most current semiconductor photodiodes for nearly unrestricted use in any light measurement application. The dynamic range is supported by 8 gain ranges each calibrated for 0.2 % precision.

Adjustable integration time

The fast sampling rate of the P-9801 ADC enables an adjustable integration time of 1 ms up to 999 s formed by the average of multiple measurements with 100 µs integration time. This averaging feature supports fast data logger measurements used in peak-to-peak, short pulse energy measurements and other modes.

Metal housing for use in strong electromagnetic environments

The P-9801 features a high quality metal housing for best EMV shielding and rack mount option for protection in strong ambient electromagnetic environments, as in high power arc lamp measurement for example.

Three different versions for universal use in high speed applications

P-9801-V01 is set-up with a gain dependent slew rate of 2 ms to 10 ms for universal light measurement purposes.

P-9801-V02 amplifier offers a gain range independent rise time for the pulse energy measurement of short light flashes using a pulse stretching method.

P-9801-V03 offers a fast rise time of 1 ms for high speed data logger applications with external trigger and pre-trigger function.

Measurement Range Specifications with Light Detectors

The measurement range of optometer combined with light detector is calculated by the measurement range specification of the optometer and the responsivity of the detector head as follows:

- **Offset signal**

= Maximum Resolution = meter current offset signal / detector sensitivity
Sample: $0.1 \text{ pA} (0.1E - 12 \text{ A}) / 3 \text{ nA/(mW/cm}^2)$ (irradiance detector) = 0.33 nW/cm^2

- **Minimum measureable irradiation**

= offset signal * signal to noise ratio factor
Sample: $0.33 \text{ nW/cm}^2 * 50 = 17 \text{ nW/cm}^2$

- **Maximum measureable irradiation ***

= max. signal current detector / detector sensitivity
Sample: $1 \text{ mA} (10E - 3 \text{ A}) / 3 \text{ nA/(mW/cm}^2) = 333333 \text{ W/cm}^2$

- **Display range**

= Offset signal to maximum measureable signal
Sample: 0.33 nW/cm^2 to 333333 W/cm^2

- **Measurement range**

= min measureable irradiation to maximum measureable irradiation
Sample: 17 nW/cm^2 to 333333 W/cm^2

**) The maximum measureable irradiation value may also be limited by thermal radiation, intense UV radiation or other application dependent parameters which must be considered by the end-user.*

Specifications

General

Short description	Powerful and fast multichannel optometer for a multitude of applications thanks to the large selection of different detectors.
Main features	simultaneous measurement of all eight detector channels, large linear dynamic range, short rise time with variable sampling rate, fast multi-channel data logging, manual or interface operation, powerful 16 bit microprocessor, trigger input with pre-trigger function. Three different versions available (different time constant).
Measurement range	depending on the detector, dynamic of 8 ranges available: 2,000 mA to 0,1 pA manuell or autorange
Typical applications	Due to the large variety of different measuring heads suitable for a variety of applications

Calibration	Calibrate and adjust the current sensitivity in all eight gain levels. Memory for the calibration data of several measuring heads for the measurement in the absolute unit of the selected measuring head.																																																																								
Product																																																																									
Power Supply	(6.5 – 7.5) VDC / 1A Plug: 5,5 / 2,5 mm / 10 mm																																																																								
Detector interface	8 BNC sockets <i>Information: By color measurements four channels are needed for one detector, this is why two color channels are possible.</i>																																																																								
Trigger	CMOS level (0/5V) / BNC socket, internal pull-up 10 k to + 5 V																																																																								
Analog output	± 2.5 V (max. + - 5 V), Ri = 100 R, max. Current = 2 mA, BNC socket																																																																								
Inputs	Amperes, optical units corresponding to calibration data, factor, percent, log (depends on the measurement quantity)																																																																								
Measurement range	8 (2.000 mA to 0.1 pA) manual or autorange																																																																								
CW integration time	1 ms – 999.999 s																																																																								
Pulse trigger	Key run / stop for all channels (channel 1 – channel 8) rising edge or trailing edge																																																																								
Pulse integration time	1 ms – 999.999 s																																																																								
Pulse pre trigger time	0 ms – 400 ms																																																																								
Offset	Correction range transcending																																																																								
Parameter adjustment	Remote control or front panel keys (menu), adjusted values permanently stored (EEPROM)																																																																								
Calibration information	Stored in EEPROM max. 20 detectors (each 80 entries, e.g. wavelength, interpolation between the entries), manual calibration factor (keys) E (illuminance) and Ø (total flux) each with one calibration entry																																																																								
Logger memory	Max. 5957 entries each channel, stored in RAM																																																																								
Measurement range	<table border="1"> <thead> <tr> <th>range nr.</th> <th>range (A/V)</th> <th>range max.</th> <th>slew rate (10–90)% P-9801-V0</th> <th>slew rate (10–90)% P-9801-V0</th> <th>slew rate (10–90)% P-9801-V0</th> <th>gain error * ± offset error (at 20 °C)</th> <th>gain (A/V) analogue output</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>1x10-3</td> <td>± 2.500 m A</td> <td>2 ms</td> <td>20 ms</td> <td>1 ms</td> <td>0.2 % ± 0.001 m A</td> <td>1x10-3</td> </tr> <tr> <td>1</td> <td>1x10-4</td> <td>± 250.0 µA</td> <td>2 ms</td> <td>20 ms</td> <td>1 ms</td> <td>0.2 % ± 0.1 µA</td> <td>1x10-4</td> </tr> <tr> <td>2</td> <td>1x10-5</td> <td>± 25.00 µA</td> <td>3 ms</td> <td>20 ms</td> <td>1 ms</td> <td>0.2 % ± 0.01 µA</td> <td>1x10-5</td> </tr> <tr> <td>3</td> <td>1x10-6</td> <td>± 2.500 µA</td> <td>3 ms</td> <td>20 ms</td> <td>1 ms</td> <td>0.2 % ± 0.001 µA</td> <td>1x10-6</td> </tr> <tr> <td>4</td> <td>1x10-7</td> <td>± 250.0 nA</td> <td>4 ms</td> <td>20 ms</td> <td>1 ms</td> <td>0.2 % ± 0.1 nA</td> <td>1x10-7</td> </tr> <tr> <td>5</td> <td>1x10-8</td> <td>± 25.00 nA</td> <td>4 ms</td> <td>20 ms</td> <td>1 ms</td> <td>0.2 % ± 0.01 nA</td> <td>1x10-8</td> </tr> <tr> <td>6</td> <td>1x10-9</td> <td>± 2.500 nA</td> <td>10 ms</td> <td>20 ms</td> <td>10 ms</td> <td>0.5 % ± 2 pA</td> <td>1x10-9</td> </tr> <tr> <td>7</td> <td>1x10-10</td> <td>± 250.0 pA</td> <td>10 ms</td> <td>20 ms</td> <td>10 ms</td> <td>0.5 % ± 2 pA</td> <td>1x10-10</td> </tr> </tbody> </table>	range nr.	range (A/V)	range max.	slew rate (10–90)% P-9801-V0	slew rate (10–90)% P-9801-V0	slew rate (10–90)% P-9801-V0	gain error * ± offset error (at 20 °C)	gain (A/V) analogue output	0	1x10-3	± 2.500 m A	2 ms	20 ms	1 ms	0.2 % ± 0.001 m A	1x10-3	1	1x10-4	± 250.0 µA	2 ms	20 ms	1 ms	0.2 % ± 0.1 µA	1x10-4	2	1x10-5	± 25.00 µA	3 ms	20 ms	1 ms	0.2 % ± 0.01 µA	1x10-5	3	1x10-6	± 2.500 µA	3 ms	20 ms	1 ms	0.2 % ± 0.001 µA	1x10-6	4	1x10-7	± 250.0 nA	4 ms	20 ms	1 ms	0.2 % ± 0.1 nA	1x10-7	5	1x10-8	± 25.00 nA	4 ms	20 ms	1 ms	0.2 % ± 0.01 nA	1x10-8	6	1x10-9	± 2.500 nA	10 ms	20 ms	10 ms	0.5 % ± 2 pA	1x10-9	7	1x10-10	± 250.0 pA	10 ms	20 ms	10 ms	0.5 % ± 2 pA	1x10-10

* Current calibration of each range by use of a precise current source with DAkkS calibration

Plug Types	DSUB 9pin female	Function	
	2	TxD	
	3	RxD	
	5	GND	
	1-4-6	connected	
	7-8	connected	
To connect the P-9801 to the RS232 interface of a PC a 1:1 cable has to be used (one side male connector, the other side female connector, no null modem cable!)			
Measurement modes	Menu item Display Mode	Submenu item Absolute	displays the measurement respective of any offset and calibration factors programmed
		Relative Percent	displays the measurement as percentage of a reference value
		Relative Factor	displays the measurement referred to a reference value
		Relative Logarithmic Dose	displays the measurement in dB in relation to a reference value
		No Display	accumulates the single readings and displays the result as exposure for measured quantity
	Range		no display of the selected channel
			selects the range 1 to 8 or switches into the autorange mode (9)
	Detector	Ampere	shows the reading in ampere units
		Manual	allows entering a calibration factor manually
		Select Table Entry	selects calibration data table entry
		Select Detector Recalibration	selects calibration data table performs recalibration of selected calibration table entry with a reference lamp
	Offset		performs an automatic offset adjustment
	Reference		sets a reference value, used in different display modes
	Main Mode	CW	measurement display of single channels
		Color	measurement display color mode
		Pulse	measurement of short and single light pulses
		Pulse Color	measurement of short and single light pulses, result displayed as color values
	Setup	RS232	remote control RS232
		IEEE488	remote control IEEE488
		Measurement Time	sets the integration time
		Analog Out	selects the channel switched to analog output
		Dose Run Time	sets the maximum time duration for exposure measurement
		Dose Maximum	sets the max. dose level for the exposure measurement mode
		Display Illumination	display backlight on / off
		Display Digits	adjusts the number of displayed digits (4, 5, or automatic)
		Color Setup	adjustments for color measurement
		IEEE488 Address	selection of address for IEEE488 interface

Miscellaneous

Front panel control	16 keys, menu system
Interface	RS232: 600 – 57600 Baud, 8 Data Bit, 1 Stop Bit, No Parity, Connector DSUB 9pins, female IEEE488: AH1, SH1, L4, T4
Dimensions	280 mm x 250 mm x 70 mm
Warranty	12 months
Temperature range	Operating: (5 to 40) °C Storage: (-10 to 50) °C
Humidity	<80%, non-condensing
Info	Regular recalibration of the current calibration is recommended. Especially when very small measurement currents have to be measured. In the case of very high humidity, fault currents of the radiometer are possible at low measuring currents and should be taken into account.

Accessories

Power Supply	230 VAC / 7 VDC / 1.2 A or 120 VAC / 7 VDC / 1.2 A

UV-3701		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 315-400nm (UV-A), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3701/
UV-3702		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 280-315nm (UV-B), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3702/
UV-3703		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 200/250-280nm (UV-C), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3703/
UV-3710		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 320-400nm (UV-A), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3710/
UV-3711		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 280-320nm (UV-B), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3711/
UV-3716		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 305-400nm (UV-A), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3716/
UV-3717		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 315-400nm (UV-A), low cross talk from radiation > 400 nm, cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3717/
UV-3719		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 250-400nm (UV), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3719/
UV-3720		Detector head for the measurement of irradiance of UV radiation in W/m ² . Features: spectral responsivity from 240-320nm (UV), cosine field-of-view, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/uv-3720/

RCH-010		Detector head for high intensity irradiation in UV H-type light curing processes.	https://www.gigahertz-optik.com/en-us/product/rch-4/
RCH-011		Detector head for high intensity irradiation in UVA peak light curing processes.	https://www.gigahertz-optik.com/en-us/product/rch-5/
RCH-012		Detector head for high intensity irradiation in blue light curing processes.	https://www.gigahertz-optik.com/en-us/product/rch-6/
RCH-013		Irradiance Detector for UV or Blue light curing processes	https://www.gigahertz-optik.com/en-us/product/rch-7/
RCH-014		Detector head for high intensity irradiation in UV or blue light curing processes. Features: Separate light integrator and detector with flexible fiber coupling, 400nm+436nm BLUE responsivity, wide viewing angle, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/rch-8/
RCH-015		Detector head for high intensity irradiation in UV or blue light curing processes. Features: Separate light integrator and detector with flexible fiber coupling, light, 436nm BLUE-Peak responsivity, wide viewing angle, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/rch-9/
RCH-106		Detector head for high intensity irradiation in UV wide range curing processes	https://www.gigahertz-optik.com/en-us/product/rch-10/
PD-11 Series		Detector head with DP-11 mount	https://www.gigahertz-optik.com/en-us/product/pd-11-serie/
RCH-108		Detector head for high intensity irradiation in UVA Peak light curing processes	https://www.gigahertz-optik.com/en-us/product/rch-11/
RCH-109		Detector head for high intensity irradiation in blue-peak light curing processes	https://www.gigahertz-optik.com/en-us/product/rch-12/

Product Name	Product Image	Description	Go to product
RCH-110		Detector head for high intensity irradiation in H-Type light curing processes	https://www.gigahertz-optik.com/en-us/product/rch-13/
RCH-111		Detector head for high intensity irradiation in UVA light curing processes	https://www.gigahertz-optik.com/en-us/product/rch-14/
RCH-112		Detector head for high intensity irradiation blue light curing processes.	https://www.gigahertz-optik.com/en-us/product/rch-15/
RCH-113		Detector head for high intensity irradiation in UV or blue light curing processes	https://www.gigahertz-optik.com/en-us/product/rch-16/
RCH-114		Detector head for high intensity irradiation in UV or blue light curing processes. Features: Separate light integrator and detector with rigid fiber coupling, 400nm+436nm BLUE responsivity, wide viewing angle, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/rch-17/
RCH-115		Detector head for high intensity irradiation in UV or blue light curing processes. Features: Separate light integrator and detector with rigid fiber coupling, light, 436nm BLUE-Peak responsivity, wide viewing angle, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/rch-18/
MD-37 series		Detector head with M30x1 mount. Features: modular detector for use MD-37, SRT and other accessories, Si, SiLP, InGaAs, SiC, GaP photodiodes, for use with optometers and signal amplifiers	https://www.gigahertz-optik.com/en-us/product/md-37-serie/
RW-37 with SRT-M37-L		Detector heads to measure the irradiance in W/m² and the radiance in W/(m²sr)	https://www.gigahertz-optik.com/en-us/product/rw-37usrt-m37-l/
RCH-002		Detector Head for High-Intensity Irradiation in UVA or Blue Light Curing Processes	https://www.gigahertz-optik.com/en-us/product/rch-002/
RCH-005		Detector head for high intensity irradiation in UV or blue light curing processes. Features: Separate light integrator and detector with rigid fiber coupling, (320-460)nm UVBLUE responsivity, wide viewing angle, for the usage with optometers and amplifiers, calibration certificate.	https://www.gigahertz-optik.com/en-us/product/rch-005/
K-xx-C		Calibration of the signal current sensitivity of optometers. Features: calibration of all gain stages, traceable calibrated current source, calibration certificate	https://www.gigahertz-optik.com/en-us/product/k-xx-c/
ISD-5P-SiUV		Integrating sphere detector with UV-enhanced Si photodiode and 50 mm sphere for Laser power in W	https://www.gigahertz-optik.com/en-us/product/isd-5p-siuv-2/

Product Name	Product Image	Description	Go to product
UV-37 with SRT-M37-L-UV		Detector heads to measure the UV irradiance in W/m ² and the UV-radiance in W/(m ² sr)	https://www.gigahertz-optik.com/en-us/product/uv-37usrt-m37-l-uv/
UV-3726		UV detector for UV-C LEDs and low-pressure Hg germicidal lamps	https://www.gigahertz-optik.com/en-us/product/uv-3726/
RCH-xxx Series		UV Detectors for measuring the UV Curing Irradiance	https://www.gigahertz-optik.com/en-us/product/rch-xxx-series/
ISD-5P-IGA		Integrating sphere detector with InGaAs photodiode and 50 mm sphere for Laser power in W	https://www.gigahertz-optik.com/en-us/product/isd-5p-iga-2/

Purchasing information

Article-Nr	Modell	Description
Product		
15295256	P-9801-V01	Meter, with power supply and manual
15295254	P-9801-V02	Meter, with power supply and manual
15295255	P-9801-V03	Meter, with power supply and manual
Calibration		
15300323	K-P9801-C	Current calibration and adjustment of all eight gain ranges in one channel of P-9801. Calibration certificate.
15300685	K-P9801n-C	Calibration of additional channel(s) together with K-P9801-C.
Options		
15295279	P-98Z-01	Rack mount option to mount model P-9801 into 19in standard racks
	Light Detectors	Please check the light detector datasheets for specification and purchasing information
Software		
15298142	S-P9801	User software for P9801 and variants.
15298842	S-SDK-P9801	Software Development Kit for the implementation of the P9801 or variants into custom made software
Accessories		
15295220	BHO-02	Hard case to carry and store P-9801 with light detector and accessories. Separate document partition.

Contact, Calibration, Service & Support

We are known worldwide for excellent technical consulting and after sales support. Contact us to find together the best solution for you. Our services:

- Technical Consulting & Sales
- After-Sales Support
- Calibrations & Re-Calibrations ([ISO/IEC 17025 Calibration Services](#), [factory calibration](#), [Calibration of Third-Party Products](#))
- Repairs & Updates
- OEM & Feasibility Consulting of Customized Solutions

[Send us your inquiry](#) or contact us by phone or e-mail. We would welcome your feedback too or review us on [Google](#).
